

## Project Presentations – Erosion, Water, Trees, Native Grasslands at “Knockalong”

Funded through Snowy River Interstate Landcare

<b>When:</b>	<b>Wednesday 13<sup>th</sup> March 2013</b>
<b>Where:</b>	<b>The property – “Knockalong”, meet at the shearing shed!</b>
<b>Time:</b>	<b>09.00am – 3pm early arrivals welcome</b>
<b>Cost:</b>	<b>No cost, lunch, morning &amp; afternoon tea provided</b>
<b>Presenter:</b>	<b>Rowan Wright</b>

### Key areas for tour & discussion:

- Rehabilitation of erosion sites:- Terraced sediment traps, water diversion methods.
- Re-establishment of native trees:- fenced regeneration, fenced native plantation, broadcast tree seed plantation site.
- Managing native grasslands in both a primary production and environmental context. Presentation of Purple Patch project. Harvesting of native grass seed.
- Water- storage, distribution and retention:- storage systems, water transfer and the use of Keyline.

### Knowledge Bank

A number of professionals with experience and knowledge in the above areas will be present on the day for discussion. **An information DVD** will be available on the day. It will contain information on all projects including detailed project reports, management principals relating to stock, water, soils, trees and weeds, as well as documentation methods. Printed material will be available. Information can also be accessed via internet at <http://www.knockalong.com>
