

Fire Trailer Setup – stationary unit

This trailer is designed to be placed at a water reservoir (water tank, dam, stock trough). It can be used as a “quick-fill” unit or maybe more importantly as an “at house” “last stand” unit.

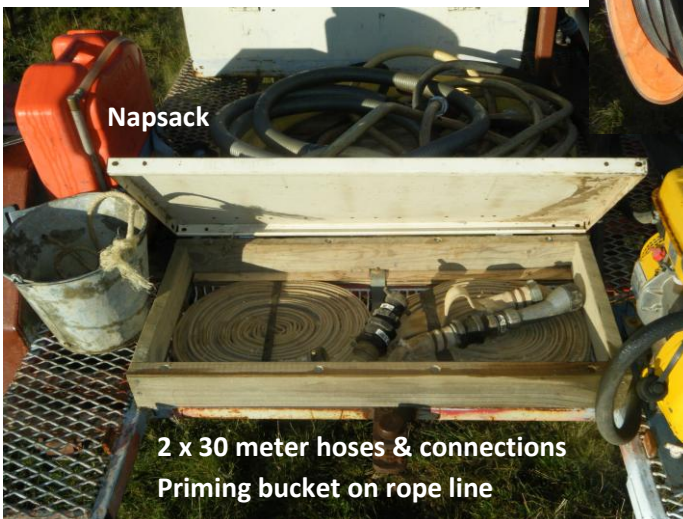

30 meter hose

Tools, jack & hose connections

Suction & transfer hoses
2 x 10 meter hoses

Napsack

2 x 30 meter hoses & connections
Priming bucket on rope line

Rear leveling jack
